Sorry, your current IP Address is Blocked

Why is my IP address blocked?

Usually it's because of one of the following reasons:

- You are accessing our site from an unsupported country. We do not provide our services to users in all countries.
- You are using a satellite Internet provider. We block access from satellite Internet providers.
- You are using a proxy server. We block access from proxy servers.
- You are using VPN server or application. We block access from VPN servers.
- Someone in your neighbourhood has misused our services and forced us to block your whole neighbourhood.
- You are using browser Opera Mini

So what can I do to regain access to my account?

Just avoid using satellite internet providers and proxy servers, and make sure to access our site from a supported country.

By the way, what is an "IP address"?

An IP address (Internet Protocol address) is a unique address that your computer uses in order to identify itself and to communicate with other computers on the Internet; for example our servers. Your IP address is provided by your ISP (Internet Service Provider).
